

Green Compass Navigator GCNAV-1a

TM

HD Graphics
Dual Display
Small Form Factor
Low Energy Consumption

Infotology's Green Compass Navigator Marine Computers are designed for performance and reliability. Our navigation systems are aimed at workboat, fishing and leisure vessels and are optimised to work with Transas Navi-Sailor 4000 ECS and Transas Navigator software. They will also support other leading navigation software.

Our innovative GCNAV-1a incorporates a 50 channel embedded GPS engine; energy efficient, fanless, dual core processor; dual display HD graphics, Solid State Drive and 2 serial ports, in a small form factor, industrial or rack-mount chassis. It is supplied with Windows 7, an IP67 rated keyboard with built in mouse pointer, and standard GPS antenna. Connection to NMEA networks is via optional multiplexer or serial over IP server.

Infotology specialise in providing reliable IT services to business and our experience in providing fault tolerant systems has gone into designing our reliable marine navigation systems.
